

COLOUR GRADIENTS

You can try out various gradient techniques here. Why not experiment with completely different colours? After all, there are no limits to your fantasy! In the comment fields below, you can write down which colours you have used to ensure that you do not forget your colour combinations. Make a note of which type of paper you have used for printing as well. We recommend the transotype MARKER PAD, because it guarantees that the colours will not bleed. If you use other types of paper, this may result in large colour differences and the COPIC Markers may bleed.
